Made in China

CE RoHS COMPLIANT UK CA

WHAT'S IN THE BOX

- 16-Foot Multicolor LED Strip
- 6.5-foot Power Cable
- Waterproof Battery Case
- Remote Control
- Cable Ties
- Double-Sided Adhesive Pad

TIPS FOR THE BATTERY

- Use 3 high-quality AA batteries (not included).
- Weaker light output means the batteries need to be replaced.
- Remove the battery cover and replace the old batteries with 3 new ones.
- When replacing the batteries, respect the "+" and "-" polarities.
- Used batteries must not be thrown away with household waste as they contain harmful substances like cadmium, mercury, and lead. Dispose of them in the appropriate battery recycling center.
- If you're not planning to use the lights for a long time, please remove the batteries to save power and protect the lights.
- Do not mix old batteries with new batteries.
- Do not mix alkaline, standard (carbon-zinc), and rechargeable batteries.

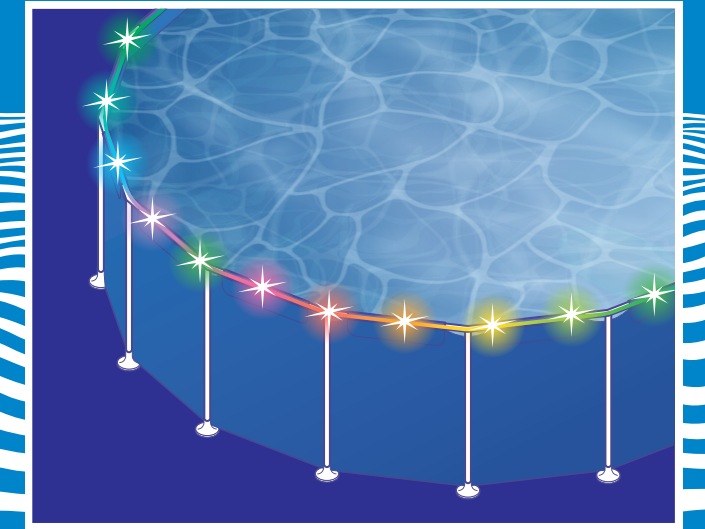

WARNING

- Always supervise children when the strip lights are in use around the pool.
- The product or its packaging are not toys: they pose a risk of suffocation.
- Make all pool users aware that the strip lights, when installed or in operation, can present a tripping risk, and caution should be exercised to avoid accidents.
- Do not modify the product structure or any of its components.
- Any repairs must be done by the manufacturer's service technicians.
- Protect the product from water, moisture, wind, and extreme temperatures.
- Observe general safety regulations and measures for handling electrical devices.
- If the cable is damaged, do not use the device.
- Ensure that the electrical cable is not pinched and that its positioning does not create a tripping hazard.

YANKEE

16-Foot Multicolor LED Strip for Above-Ground Pool Rims

USER MANUAL

THANK YOU FOR TRUSTING OUR PRODUCTS!

You've now enhanced the aesthetic appeal of your pool with vibrant illumination. These lights promise ease of use and durability and ensure many delightful and luminous evenings ahead.

DISCOVER THE BENEFITS

Seamless Integration

The flexible design of the strip lights allows for perfect alignment with your pool's contours, creating a harmonious and modern look that enhances the overall pool architecture.

Weather-Resistant Brilliance

Designed to withstand outdoor elements, these strip lights are not only waterproof but also resistant to temperature variations for long-term reliability and performance.

Energy Efficient Glow

Utilizing advanced LED technology, the strip lights provide bright and consistent illumination while being energy-efficient, reducing both environmental impact and electricity costs.

Customizable Brilliance

Equipped with a variety of lighting modes and color options, these strip lights offer the flexibility to set the perfect mood for any occasion, from serene to festive.

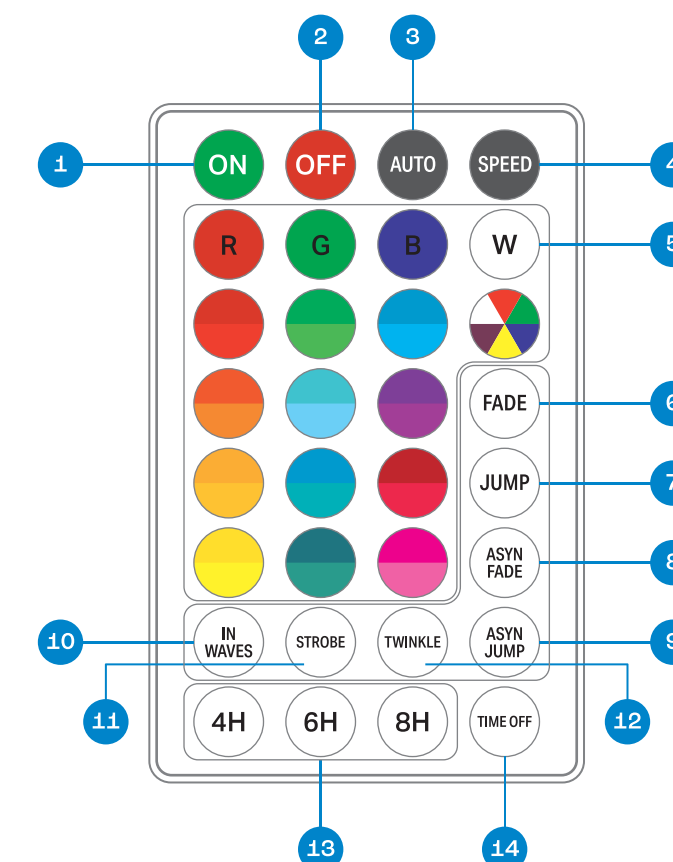

- Please read this manual before using the lights and keep the manual for reference.
- Don't use the lights in any ways that are not described in this manual.
- If you have any questions about the lights or face any issues when using them, feel free to contact us directly at info@yankeepoolcovers.com for answers and assistance.

INSTALLING THE LIGHTS

- 1 Unfold the LED strip and attach its starting end to the rim of your above-ground pool (or another structure) using one of the cable ties.
- 2 Continue attaching the LED strip, securing it at regular intervals with cable ties.
- 3 Attach the battery case to the pool wall (or another appropriate surface) using the adhesive pad. Make sure the case is positioned conveniently for you to aim the remote control at it.
- 4 Insert 3 high-quality AA batteries (not included) into the battery case and use the remote control to turn the lights on.
- 5 Experiment with the modes, speeds, and colors to create the lighting setup you find most enjoyable.

REMOTE CONTROL

- 1 ON: Turn the lights on (start at the latest settings)
- 2 OFF: Turn off the lights and the timer at the same time
- 3 AUTO: The lights automatically switch among dynamic modes: FADE, JUMP, ASYNCHRONOUS FADE, ASYNCHRONOUS JUMP, TWINKLE, STROBE, IN WAVES
- 4 SPEED: 4 speed adjustments for the dynamic modes. The cycle starts with the lowest speed. Each click increases the speed and then sends it back to the lowest (1-2-3-4-1...). The default speed when the lights are on is 3.
- 5 COLOR: Choose the color for the lights by pressing one of the 15 color buttons, the W (white) button, or the multi-color button.
- 6 FADE: The lights go out in a synchronous mode
- 7 JUMP: The lights flicker in a synchronous mode
- 8 ASYN FADE: The lights go out in an asynchronous mode
- 9 ASYN JUMP: The lights flicker in an asynchronous mode
- 10 IN WAVES: The lights go from dim to bright and back
- 11 STROBE: Strobe light flashes on one or two background colors (press the button to change)
- 12 TWINKLE: Two or three colors twinkle (press to change)
- 13 Timer buttons:
 - 4H: The lights will be on for 4 hours and then off for 20 hours
 - 6H: The lights will be on for 6 hours and then off for 18 hours
 - 8H: The lights will be on for 8 hours and then off for 16 hours
- 14 TIMER OFF: The timer switches off. The light flashes once when the button is clicked.
